

## CB-12

ALUMINIUM

Designed for special forces in river or coastal operations, the CB12 is an exceptionally fast and agile boat that can make extremely tight turns at high speed, decelerate from top speed to a stop at 2.5 boat lengths, and adjust pitch and roll on the fly. Light weight, shallow draft and twin water jets allow speeds up to 45 knots (83 km/h) in shallow coastal waters. The water propulsion is partially located in the channels, which, together with underwater rudders, similar to the diving rudders of a submarine, gives excellent maneuverability. The combat complex of the boat is a remotely controlled combat module. Boats can use different combinations of interchangeable weapons. Standard armament includes: One 12.7 mm machine gun or one 40 mm grenade launcher on a rotary mount. Three 7.62 mm machine guns, one per side.

Length overall (m)	12,05
Width overall (m)	3,21
Total height (m)	4,5
Weight dry hull (kg)	7500
Engine type	2 Inboard
Motors - total units	2
Motors - Horse power per unit	2x550
Max. Draught (m)	0,56
Max. Payload (kg)	1200
Fuel type	Diesel

Crew limit (Skt)	2/6
Fuel tank size (L)	1200
Cruising speed (kn)	37
Top speed (kn)	up to 45
Construction material	Aluminium, Armor cabin B6

## Standard Equipment

- Aluminum Hull
- Fender
- 2x550 MHP @ 3300 RPM hp diesel engine
- 2x Waterjet
- Cabin
- 6 Crew seats + 1 Captain + 1 CO-Captain
- Non-slip deck
- Fuel system Bilge pump system
- Fresh water system
- Grey Water system
- AC System
- IP65 waterproof electrical system with navigation lights
- Search Light
- 2 Gunstans at rear
- Foundation For Remote Weapon Sysyem
- Shore Power
- Weapon storage
